## Citrus Blaster

### Revision 5, 22/08/2024

#### 1. IDENTIFICATION

|                     |                                                  |
|---------------------|--------------------------------------------------|
| Product Name        | Citrus Blaster                                   |
| Other Names         | D'limonene/Ethanol solution                      |
| Uses                | Solvent based degreaser                          |
| Chemical Family     | No Data Available                                |
| Chemical Formula    |                                                  |
| Chemical Name       |                                                  |
| Product Description | A colourless liquid with a neutral citrus odour. |

|                             |                       | <b>6.5B</b> | Substances that are contact sensitisers                              |
|                             | Environmental Hazards | <b>9.1A</b> | Substances that are very ecotoxic in the aquatic environment         |
|                             |                       | <b>9.2B</b> | Substances that are ecotoxic in the soil environment                 |

**3. COMPOSITION/INFORMATION ON INGREDIENTS****Ingredients**

| Chemical Entity           | Formula                         | CAS Number | Proportion |
|---------------------------|---------------------------------|------------|------------|
| D-Limonene                | C <sub>10</sub> H <sub>16</sub> | 5989-27-5  | <=30 %     |
| Ethanol                   |                                 | 64-17-5    | <=70%      |
| Non hazardous ingredients |                                 |            | <=5%       |
| Water                     |                                 | 7732-18-5  | Balance %  |
|                           |                                 |            |            |
|                           |                                 |            |            |
|                           |                                 |            |            |

**4. FIRST AID MEASURES****Description of necessary measures according to routes of exposure**

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Swallowed</b>                                 | IF SWALLOWED: Rinse mouth, then drink plenty of water. Do NOT induce vomiting. Immediately call a Poison Centre or doctor/physician for advice. If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain an open airway and prevent aspiration. Never give anything by mouth to an unconscious person.                                                                                                                             |
| <b>Eye</b>                                       | IF IN EYES: Do not rub affected area! Immediately flush eyes with running water for several minutes, holding eyelids open and occasionally lifting the upper and lower lids. Remove contact lenses if present and easy to do. Continue rinsing for at least 15 minutes. If eye irritation persists, get medical advice/attention.                                                                                                                                                      |
| <b>Skin</b>                                      | IF ON SKIN (or hair): Immediately flush skin and hair with running water for at least 15 minutes, while removing contaminated clothing and shoes. Wash skin with soap and water. If skin irritation or rash occurs, get medical advice/attention. Wash contaminated clothing and shoes before reuse.<br>*In case of burns, immediately cool affected skin for as long as possible with cold water. Do not remove clothing if adhering to skin.                                         |
| <b>Inhaled</b>                                   | IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If respiratory symptoms persist, get medical advice/attention. Give artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult. |
| <b>Advice to Doctor</b>                          | Keep victim calm and warm. Ensure that attending medical personnel are aware of identity and nature of the product (s) involved, and take precautions to protect themselves.                                                                                                                                                                                                                                                                                                           |
| <b>Medical Conditions Aggravated by Exposure</b> | No information available.                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**5. FIRE FIGHTING MEASURES**

|                                           |                                                                                                                                                                                                                                                                                                                                                                                         |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Measures</b>                   | If safe to do so, move undamaged containers from fire area. Cool container with water spray until well after fire is out. Avoid getting water inside containers.                                                                                                                                                                                                                        |
| <b>Flammability Conditions</b>            | FLAMMABLE LIQUID & VAPOUR: Will be easily ignited by heat, sparks or flames.                                                                                                                                                                                                                                                                                                            |
| <b>Extinguishing Media</b>                | Use dry chemical, Carbon dioxide (CO <sub>2</sub> ), foam or water spray for extinction - Do not use water jets.<br>*CAUTION: This product has a very low flash point: Use of water spray when fighting fire may be inefficient.                                                                                                                                                        |
| <b>Fire and Explosion Hazard</b>          | Risk of violent reaction or explosion! Vapours may form explosive mixtures with air. Vapours may travel to source of ignition and flash back. Most vapours are heavier than air and will spread along ground and will collect in low or confined areas. Vapor explosion hazard indoors, outdoors or in sewers! Many liquids are lighter than water. Containers may explode when heated. |
| <b>Hazardous Products of Combustion</b>   | Fire may produce irritating, toxic and/or corrosive gases, including Carbon oxides and other non-identified organic compounds.                                                                                                                                                                                                                                                          |
| <b>Special Fire Fighting Instructions</b> | Contain runoff from fire control or dilution water - Runoff may cause pollution. Vapours from runoff may create an explosion hazard!                                                                                                                                                                                                                                                    |
| <b>Personal Protective Equipment</b>      | Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.                                                                                                                                                                                                                                    |
| <b>Flash Point</b>                        | 45 - 48 °C                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Lower Explosion Limit</b>              | 0.7 %                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Upper Explosion Limit</b>              | 6.1 %                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Auto Ignition Temperature</b>          | 237 °C                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Hazchem Code</b>                       | 3Y                                                                                                                                                                                                                                                                                                                                                                                      |

## 6. ACCIDENTAL RELEASE MEASURES

|                                             |                                                                                                                                                                                                                                                                                                                                                |
|---------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Response Procedure</b>           | Ensure adequate ventilation - Ventilate enclosed spaces before entering. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). All equipment used in handling the product must be earthed. Do not touch or walk through spilled material. Avoid breathing vapours and contact with eyes, skin and clothing. |
| <b>Clean Up Procedures</b>                  | Absorb with earth, sand or other non-combustible material. Use clean, non-sparking tools to collect absorbed material and place it into suitable containers for later disposal (see SECTION 13).                                                                                                                                               |
| <b>Containment</b>                          | Stop leak if you can do it without risk. Prevent entry into waterways, sewers, basements or confined areas. Dike far ahead of large spill for later disposal.<br>*Vapour-suppressing foam may be used to control vapours. Water spray may reduce vapour, but may not prevent ignition in closed spaces.                                        |
| <b>Decontamination</b>                      | Clean area with soap (detergent) and water.                                                                                                                                                                                                                                                                                                    |
| <b>Environmental Precautionary Measures</b> | Spillages and decontamination runoff should be prevented from entering drains and watercourses.                                                                                                                                                                                                                                                |
| <b>Evacuation Criteria</b>                  | Spill or leak area should be isolated immediately. Keep unauthorised personnel away. Keep upwind and to higher ground.<br>*Large spill: Immediately contact Police or Fire Brigade. Consider initial downwind evacuation for at least 300 m.                                                                                                   |
| <b>Personal Precautionary Measures</b>      | SCBA and gas-tight suits should be worn when dealing with damaged or leaking containers and where there is no risk of ignition. SCBA and structural firefighting uniform provide limited protection where there is a risk of ignition.                                                                                                         |

## 7. HANDLING AND STORAGE

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Handling</b>  | Safety showers and eyewash facilities should be provided within the immediate work area for emergency use. Ensure adequate ventilation. Handle in accordance with good industrial hygiene and safety practice. Avoid breathing mist/vapours and contact with eyes, skin and clothing. Do not ingest. Wear protective gloves/protective clothing/eye protection/face protection (see SECTION 8). FLAMMABLE LIQUID & VAPOUR: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources - No smoking. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. |
| <b>Storage</b>   | Store in a cool, dry and well-ventilated place, out of direct sunlight. Keep container tightly closed. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources - No smoking. Keep away from foodstuffs and incompatible materials (see SECTION 10). Store locked up.                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Container</b> | Keep in the original container.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

**8. EXPOSURE CONTROLS / PERSONAL PROTECTION**

|                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General</b>                       | No specific exposure standards are available for this product.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Exposure Limits</b>               | No Data Available                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Biological Limits</b>             | No information available.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Engineering Measures</b>          | A system of local and/or general exhaust is recommended to keep employee exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area.                                                                                                                                                                                                                                                                                                                                   |
| <b>Personal Protection Equipment</b> | <ul style="list-style-type: none"> <li>- Respiratory protection: In case of inadequate ventilation, wear respiratory protection. Recommended: Organic vapour respirator (refer to AS/NZS 1715 &amp; 1716).</li> <li>- Eye/face protection: Wear appropriate eye protection to avoid eye contact. Recommended: Use safety glasses and face shield, if required.</li> <li>- Hand protection: Wear protective gloves. Recommended: Use chemically-resistant gloves.</li> <li>- Skin/body protection: Wear appropriate personal protective clothing to prevent skin contact. Recommended: Overalls, safety shoes.</li> </ul> |
| <b>Special Hazards Precautions</b>   | Vapour heavier than air – prevent concentration in hollows or sumps. Do NOT enter confined spaces where vapour may have collected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Work Hygienic Practices</b>       | Do not eat, drink or smoke when using this product. Wash the hands thoroughly after handling and before eating, drinking or smoking. Contaminated clothing must be changed and washed before reuse. Contaminated work clothing should not be allowed out of the workplace.                                                                                                                                                                                                                                                                                                                                               |

| <b>Flame Propagation or Burning Rate of Solid Materials</b>           | No information available.                                                                                                                    |
| <b>Non-Flammables That Could Contribute Unusual Hazards to a Fire</b> | Combustible material that has been soaked with D-Limonene may spontaneously combust.                                                         |
| <b>Properties That May Initiate or Contribute to Fire Intensity</b>   | FLAMMABLE LIQUID & VAPOUR: May be ignited by heat, sparks or flames.                                                                         |
| <b>Reactions That Release Gases or Vapours</b>                        | Fire/decomposition may produce irritating, toxic and/or corrosive gases, including Carbon oxides and other non-identified organic compounds. |
| <b>Release of Invisible Flammable Vapours and Gases</b>               | Vapours may form explosive mixtures with air.                                                                                                |

## 10. STABILITY AND REACTIVITY

|                                         |                                                                                                                                              |
|-----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Information</b>              | Peroxides formed by oxidation may present an explosion hazard if they become highly concentrated through distillation.                       |
| <b>Chemical Stability</b>               | Stable under normal conditions of storage and use.                                                                                           |
| <b>Conditions to Avoid</b>              | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.                                                           |
| <b>Materials to Avoid</b>               | Incompatible/reactive with strong oxidising agents, acidic clays and mineral acids.                                                          |
| <b>Hazardous Decomposition Products</b> | Fire/decomposition may produce irritating, toxic and/or corrosive gases, including Carbon oxides and other non-identified organic compounds. |
| <b>Hazardous Polymerisation</b>         | Hazardous polymerisation will not occur.                                                                                                     |

## 11. TOXICOLOGICAL INFORMATION

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Information</b> | <ul style="list-style-type: none"><li>- Acute toxicity: May be harmful if swallowed. May cause gastrointestinal irritation, abdominal pain, nausea, vomiting, diarrhoea, drowsiness, dizziness.</li><li>- Skin corrosion/irritation: Causes skin irritation. May cause reddening, swelling, blistering. Product has a degreasing effect; Repeated exposure may cause skin dryness.</li><li>- Eye damage/irritation: May cause eye irritation, reddening.</li><li>- Respiratory/skin sensitisation: May cause an allergic skin reaction.</li><li>- Germ cell mutagenicity: No information available.</li><li>- Carcinogenicity: No information available.</li><li>- Reproductive toxicity: No damage to embryo or foetus when exposure values are observed.</li><li>- STOT (single exposure): May cause irritation to the respiratory tract. May cause respiratory disruptions, sore throat, coughing, shortness of breath, drowsiness, dizziness, nausea.</li><li>- STOT (repeated exposure): No information available.</li><li>- Aspiration toxicity: May be fatal if swallowed and enters airways.</li></ul> |

| <b>Carcinogen Category</b> | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## 12. ECOLOGICAL INFORMATION

|                    |                                                                                                                                  |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>Ecotoxicity</b> | Aquatic toxicity: <ul style="list-style-type: none"><li>- LC50, Fish (Pimephales promelas): 0.619 - 0.796 mg/L (96 h).</li></ul> |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------|

- EC50, Crustacea (Daphnia magna): 0.577 mg/L (48 h).

**Persistence/Degradability**

The material is partially biodegradable.

**Mobility**

No information available.

**Environmental Fate**

Very toxic to aquatic life with long lasting effects - Avoid release to the environment.

**Bioaccumulation Potential**

Risk of bioaccumulation in an aquatic species is high.

**Environmental Impact**

No Data Available

### 13. DISPOSAL CONSIDERATIONS

**General Information**

Dispose of by incineration or landfill and in accordance with local/regional/national regulations.

**Special Precautions for Land Fill**

Empty containers should be washed thoroughly with detergent and water before being sent for reconditioning or disposal. The washing should be treated as trade effluent.

## Safety Data Sheet, Citrus Blaster, Revision 5, 22/08/2024

**atm** Atmosphere  
**CAS** Chemical Abstracts Service (Registry Number)  
**cm<sup>2</sup>** Square Centimetres  
**CO<sub>2</sub>** Carbon Dioxide  
**COD** Chemical Oxygen Demand  
**deg C (°C)** Degrees Celcius  
**EPA (New Zealand)** Environmental Protection Authority of New Zealand  
**deg F (°F)** Degrees Farenheit  
**g** Grams  
**g/cm<sup>3</sup>** Grams per Cubic Centimetre  
**g/l** Grams per Litre  
**HSNO** Hazardous Substance and New Organism  
**IDLH** Immediately Dangerous to Life and Health  
**immiscible** Liquids are insoluable in each other.  
**inHg** Inch of Mercury  
**inH<sub>2</sub>O** Inch of Water  
**K** Kelvin  
**kg** Kilogram  
**kg/m<sup>3</sup>** Kilograms per Cubic Metre  
**lb** Pound  
**LC<sub>50</sub>** LC stands for lethal concentration. LC<sub>50</sub> is the concentration of a material in air which causes the death of 50% (one half) of a group of test animals. The material is inhaled over a set period of time, usually 1 or 4 hours.  
**LD<sub>50</sub>** LD stands for Lethal Dose. LD<sub>50</sub> is the amount of a material, given all at once, which causes the death of 50% (one half) of a group of test animals.  
**ltr** or **L** Litre  
**m<sup>3</sup>** Cubic Metre  
**mbar** Millibar  
**mg** Milligram  
**mg/24H** Milligrams per 24 Hours  
**mg/kg** Milligrams per Kilogram  
**mg/m<sup>3</sup>** Milligrams per Cubic Metre  
**Misc** or **Miscible** Liquids form one homogeneous liquid phase regardless of the amount of either component present.  
**mm** Millimetre  
**mmH<sub>2</sub>O** Millimetres of Water  
**mPa.s** Millipascals per Second  
**N/A** Not Applicable  
**NIOSH** National Institute for Occupational Safety and Health  
**NOHSC** National Occupational Heath and Safety Commission  
**OECD** Organisation for Economic Co-operation and Development  
**Oz** Ounce  
**PEL** Permissible Exposure Limit  
**Pa** Pascal  
**ppb** Parts per Billion  
**ppm** Parts per Million  
**ppm/2h** Parts per Million per 2 Hours  
**ppm/6h** Parts per Million per 6 Hours  
**psi** Pounds per Square Inch  
**R** Rankine  
**RCP** Reciprocal Calculation Procedure  
**STEL** Short Term Exposure Limit  
**TLV** Threshold Limit Value  
**tne** Tonne  
**TWA** Time Weighted Average  
**ug/24H** Micrograms per 24 Hours  
**UN** United Nations  
**wt** Weight
